Massage for People Living with Cancer©

24 CE Hours NCTMB; Florida State Approved & Recognized by The Society for Oncology Massage
Comfort oriented massage or touch can be administered to people with cancer regardless of severity. The purpose of this class is to train touch therapists core fundamentals in oncology massage. The experience derived from this class will create a new found confidence for bodyworkers working with people who have a history of cancer and may also be at risk for lymphedema. Therapists who focus on special needs of medically frail clients will find this course very valuable. This course was developed by Gayle MacDonald, Author of "Medicine Hands: Massage for people with Cancer", and "Massage for the Hospital Patient and Medically Frail Client." It is the prerequisite class for application into the Peregrine Institute of Oncology Massage Training. www.MedicineHands.com

Bodywork in End of Life Care: Journeys in Dying©

Presencing Deep Peace© 16 CE Hours NCTMB

This two day course offers fundamental concepts in palliative care and caring touch along with practical information about clinical considerations and bodywork adjustments necessary to work safely. Understanding the dying process, pain management and end of life symptoms with respective comfort measures is also a part of the curriculum. We will explore how to work with people who have impaired communication and practice positioning adjustments for various illnesses. Time is dedicated to deepening our mindful communication skills and developing our healing presence with the dying. We will examine our personal perceptions, identify methods of self-care, and explore boundaries and ethical issues in working with the dying. A blend of lecture, case study review, discussion and hands on time, this course will help the practitioner move beyond their concerns in working with this clientele; allowing us to open to sacred moments and presence deep peace with the dying.

April 26 & 27, 2014 or July 19 & 20, 2014
